Tenafly Nature Center and the Lost Brook Preserve

A Checklist of the Birds

Tenafly Nature Center

313 Hudson Avenue, Tenafly, NJ 07670
(201) 568-6093 * fax 569-2266
info@tenaflynaturecenter.org
www.tenaflynaturecenter.org

This brochure lists 189 species that have been recorded in the Tenafly Nature Center and Lost Brook Preserve. Some 55 other species have been recorded elsewhere in Tenafly for a town total of more than 244 species.

SEASONAL OCCURRENCE

- Sp Spring (mostly April - May)
but blackbirds & ducks may arrive by late Feb., and the last spring warblers trickle through in the 1st week of June
- Su Summer (late May through August)
- F Fall (Sept. - Nov.)
though some warblers move by mid-August
- W Winter (Dec. - Feb.)

RELATIVE ABUNDANCE

- C Common: likely to be seen or heard in suitable habitat and season.
- U Uncommon: usually present in suitable habitat and season but easily missed.
- o Occasional: not always present even in the right habitat and season; may only be seen a few times a year or season.
- r Rare: unlikely to be found; may not be reported every year.
- Irr Irregular: similar to rare but may be common in some years.
- x accidental; includes historical records (pre-1985); some might occur again, others are unlikely due to habitat changes
- H Hypothetical; one observer or lacks details
- ** confirmed breeder at NC/LBP
- N? nesting unconfirmed, or may not nest every year

Please report any species listed as **r**, **x**, **Hyp**, or not on the regular list.

Thank you!
